DETAILED ACTION

The Declaration filed on 10-25-07 under 37 CFR 1.131 is sufficient to overcome the Yeo reference.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21-27, 29-37 and 39-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mandelman in view of Divakaruni, Pucher and the EPA published application (EP 1213757). The discussion of the Mandelman, Divakaruni and Pucher references is hereby incorporated by reference from the previous rejection. The EPA reference is cited to teach the inventive structure whereby a nitride liner is used to line some isolation sidewalls and not on other sidewalls. See, for example, the FIG. 3 embodiment, and the accompanying discussion in the reference.

Taken together, these references teach all of the claimed features of the invention. One skilled in the art would be motivated to combine these references so as to improve device isolation.
